DIRECT EASY

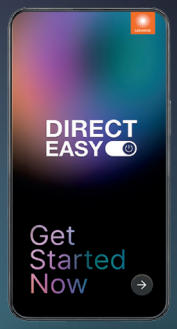
Makes professional lighting control simple: commission, configure and automate luminaires, sensors, switches and other components via smartphone – without any gateway, login or complex IT-setup.



ALWAYS TWO STEPS AHEAD:
UPDATES OF THE DIRECT EASY SOFTWARE ARE OUT NOW

AUTOMATIC OTA UPDATES VIA BLUETOOTH
The whole network, updated quickly.

OVER-THE-AIR UPDATE

Before handover, the installer brings the finished project to one latest, tested firmware state, so the customer always benefits from latest performance and feature updates.

The new Over-the-Air update menu updates every product in a network over Bluetooth. The app looks for new device updates and offers you to update them quickly in one shot.

Don‘t be afraid of updating – we designed the process to be fast and reliable so you can bring your client‘s installation always to the latest upgrade in terms of performance, security and new features.

UPDATE SPEED OF CONVENTIONAL SYSTEMS

Time to update 36 luminaires
Estimate: 5 minutes per device.

3 h*

GET UP AND RUNNING IN NO TIME WITH DIRECT EASY

New time to update 36 luminaires
Estimate: 30 sec per luminaire.

20 min*

* The specified times apply to Bluetooth-enabled Zigbee products from LEDVANCE only. Times can vary based on Bluetooth connection strength in different environments.

EASY TO HANDLE ZONE SHARING
Hand a commissioned zone over as a file. No re-configuration is required.

USE CASE 1 · COVER FOR A COLLEAGUE

If one of the installer’s colleagues is off sick or on holiday, the job can still be completed without any problems. Simply export the zone, import it and carry on.

USE CASE 2 · CONTINUE AFTER YEARS

Save the project data so that the zone can be easily extended if the rooms are modernised years later.

Easy sharing of files by exporting and importing via e-mail, messenger, cloud services or AirDrop.
