Product remark	All technical parameters apply to the entire lamp / Due to the comp production process for light-emitting diodes, the typical values show for the technical LED parameters are purely statistical values that do not necessarily match the actual technical parameters of each individual product, which can vary from the typical value / LED lamp contain several electronic components. Under unfavourable conditions these can lead to acoustic noise. In case of resonance even low no can cause audible effect. Possible factors influencing this are the installation, the design of the lamp holder and the luminaire (acoustic resonance effect) as well as the dimmer or the transformer (harmon or electronic resonance)
